

A Pair of Hearts

Two hearts can be joined together in a Celtic style (google "Celtic tatting"). You'll get the best result by not adding the decorative picots and use two different colours for the hearts.

Make the first heart using one colour. Change colour and make the three first rings and chains of the next heart.

BEFORE starting the fourth ring, R_B , put the first tree rings under the chain after R_E at the first heart to make the chains intertwine.

Make R_B to make the two hearts join as show in the diagram. Finish the second heart.
